

Water Filtration

OUTDOORS

Plan ▶

- How do you make sure the water you are drinking is safe?
- What can you do to help improve water quality?
- How do you identify water that is not safe to drink?
- Research some ways of creating a portable water filtration system

Do ▶

- Create a portable water filtration system
- How easily could you use this on a hike?
- Would you create something different if you knew you were going to be at the one location?

Review ▶

- What other ways would you suggest to ensure the water you are drinking is safe?
- How easy was it for you to create the filtration system?
- Could people in remote communities use the same system to filter water so that it is safe to drink?

Share your experience with your peers and discuss how each of you might tackle this differently next time
