

Amazing Energy

PERSONAL GROWTH

7 AFFORDABLE AND CLEAN ENERGY

Plan ►

- What types of energy can you name?
- What do you know about where energy comes from?
- What would you do if we didn't have electricity?
- Design a renewable energy source to power something you would usually power with electricity

Do ►

- Make a potato clock
- What other energy sources could you use to make a clock?
- How can you change your behaviours to minimise the energy you use?
- What renewable energy types are used by your Scout Group at the hall, on camps or in other activities?

Review ►

- How effective was your potato clock?
- What did you learn by trying a different energy source?
- Would you suggest someone in a remote community could use any of your ideas to help them have electricity?

Share your experience with your peers and discuss how each of you might tackle this differently next time
