Best For

Joey Scouts

Cub Scouts

Scouts

Venturer Scouts

Rover Scouts

Plan>

1. Collect paper and pens for use during your activity.

Do>

1. Consider a pair of jeans that cost \$43.
2. Lots of people were involved in making these jeans. As a group brainstorm who is involved in the production.

For example, Cotton growers, Cotton buyers, those who weave the cotton into fabric, factory owners who make the jeans, shop owner who sells the jeans.

3. Reveal the roles that they did not think of.
4. Split the group into five teams and give each team one of the roles. Explain that they have 10 minutes to prepare a 'pitch' to make their case for how much of the \$43 they think they should be paid and why.
5. Give each group 2 minutes to deliver their pitch.

Review>

1. Record how much money each group asked for.
2. Does the total come to more than \$43?
3. Reveal to the young people how much of the \$43 each person actually gets:
 - Cotton grower: \$1.08
 - Cotton buyer: \$1.79
 - Weaver: \$3.58
 - Factory owner: \$15.05
 - Shop owner: \$21.50
4. How do you feel about this?
5. Is it fair? Discuss how they think the \$43 should be allocated based on what they have learned about the roles from the team pitches.
